

Amendments to the Specification:

Please replace paragraph [0038] with the following amended paragraph:

[0038] The housing 4 furthermore has a total of four threaded sockets 16 which are arranged in pairs next to an elongate tube receiving area 18. The tube receiving area 18 serves to receive a support frame designed as a tubular element (cf. Figure 1b). In Figure 1a, the wiper drive 2 is shown in its state at the start of mounting. In Figure 1b, the tubular element 20 is additionally shown, said tubular element 20 being placed in the tube receiving area 18 delimited by the threaded sockets 16. The swaying element 12 is shown in a first swaying position 22 in Figure 1b.

Please add the following new paragraphs after paragraph [0065]:

[0065.1] While the method herein described, and the form of apparatus for carrying this method into effect, constitute preferred embodiments of this invention, it is to be understood that the invention is not limited to this precise method and form of apparatus, and that changes may be made in either without departing from the scope of the invention, which is defined in the appended claims.

[0065.2] What is claimed is:
